I think a small grant will cover all expenses
If you wish to make a donation to our Foundation - that will be gratefully acknowledged
Otherwise also Ok
Hope to see you soon
Love

Deepak , the testing and PREPARATION i per subject is turning out to be more time consuming than i realized . It might be good idea to give at least token compensation to some of the people involved The easiest way to do this would be to send a cheque to REGENTS OF UNIVERSITY OF CALIFORNIA For Dr Ramachandrans research on savant syndrome ; mail to Me Peter Smith-Hinkley Dept of psychology UCSD La Jolla CA 92093-0109
Needless to say OI won't get any of this for personal use - i might pay dR chunharas and others and purchase supplies exclusively for thi. This is because he has hands full completing his thesis - and i may have to recruit others

Anything ranging from 1 K to 3 would probably cover the three subjects Any unused money will be held in your name
if your funds don't permit this don't worry - ill look into in- house university sources - though it might get mired in bureaucracy
Lets meet informally next time you are in town

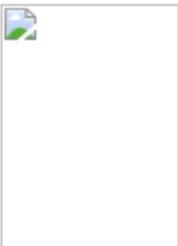

Cheers rama

Deepak , Rachel eet al The testing we did on Ramses was useful " rehearsal " and we look forward to seeing him again as well as the new subject , end of october.

Primes are easy to study - so we began with those but there are other skills too and we will design experiments to test these Rama

Hi Deepak,

Just informing that Dr. ramachandran's dept contacted me, and I think I will try to bring my son to San Diego Oct 30 for savant research. Savant is one of the most mysterious of puzzles in human species! And interestingly, a child holds the clue. ;-)

Thank you sincerely,

Love and light, Carolyn Fok

Hello Deepak,

I met you briefly at the El Cerrito HOME event. In case you didn't receive my videos (Math Savant) since you were in 'silence'. You mentioned neuroscientists could be interested.

In the videos below, you will see him do ratios of 48's up to 10,000, both plus and minus for any number. Basically, he is able to tell you the difference between his father's age (53 at the time) and his age (5 at the time) at any number range, mostly below 10,000. It was discovered last September 2016. He father lives in England so they do this through Skype. He can branch off to other people's age if he knows them, etc.

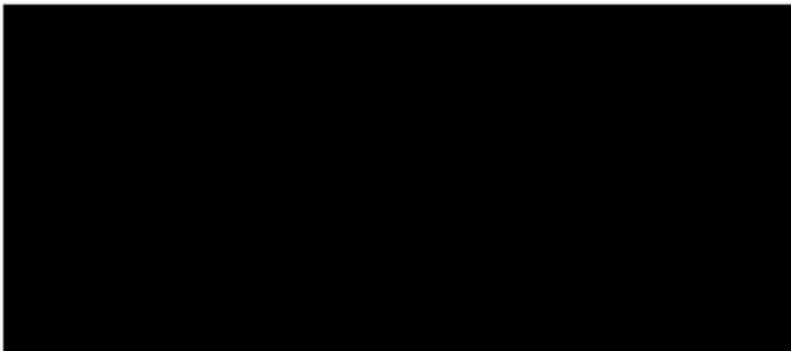

Thanks for your attention - Carolyn
