I spoke to Valdson, he explained that a technician is coming on Monday to finish the installation. The wifi is faster now, but will work better after next Monday!

All the best, [REDACTED]

I just spoke with Valdson; he says the fibre connection is installed and working with the wifi throughout the house.

I reviewed the situation with Valdson and confirm what Valdson and myself have already explained concerning the installation of the optic fiber:

ISC telephone installation has been completed.

Mr Moura from ISC will be present in the apartment while ORANGE will be installing the "livebox".

Mr Moura explained to me on the telephone that the "optic fiber livebox" (one for the 2 apartments) will be located in the technical room ("local technique") of the second apartment and a cable will be installed from there to the technical room next to Mr. Epstein's office (using existing cables).

This installation should (after verification this Wednesday morning) cover the 2 apartments.

Best regards.

Did we get a resolution on where the Orange "livebox" was going to be installed and how we are going to wire the network(s)?

Hi James,
Installation of Fiber Internet from Orange Telecom in Paris will take place on April 15th 8 AM Paris time (12AM NY Time). ISC (company that installed new phone system) representative Victor Moura will be present during fiber installation to insure that telephone equipment is working properly. Please advise if you would like to get in touch with Victor before installation or call Valdson while Orange is on the site, or you have other suggestions.

Thank you,
Bella
