Hi Larry,

We have two 430s for sale and \$430,000 worth of spare parts and tools. Both specs and pictures are enclosed. The seller is asking \$1.25M each and parts are negotiable in the deal. They are both in flyable excellent condition and will be sold with both the EMS interior (Air Methods) and a "like new" corporate seats which includes the overhead plastics.

As you know, these are a lot of helicopter for the price being twin engine, EFIS, NVG, IFR, and EMS and the owner/operator Idaho Helicopters has had them on contract for the past 6 years. He has replaced them with new Bell 429s costing over \$15M and now has them for sale. These are the best ones on the market.

They are located at the Boise International airport and if you give me some advance notice, I could make arrangements for you to see them at the Boise airport on your way through from ABQ

Please advise if you need any further information and how I can help. I live in Houston and will be traveling this weekend, but the operations crew in Boise can show you the aircraft if you can let us know,,soon.

Regards,
don
