Jeffrey,

Thanks for your message. I spoke with Doug this morning. I will bring a copy of the topo info we have, and Doug will gather the latest info he has, for our meeting at the Island. I am also reviewing the elevations with my team, to make sure they reflect what we have.

I will have copies of all options to review with you when I am there. We did add the cabana building on the east side, and have a couple versions of the pool layout, including east-west orientation, and extending under the terrace. (I am not sure if we can extend 40' under the terrace, but we can review that together, so I understand what you are looking for.)

I believe we will be able to narrow these options down quite a bit when we review them together in the field, and hopefully come up with one that incorporates all of your needs.

Thanks,

Warwick

Warwick, as i said in our call last night,, you are not using the topos that you have.. these drawings are so inaccurate , as to render them useless. There is only 20 ft form the northeast corner of the current "terrace" to the road. you show over 50 ft. I wanted one opiton with at least forty feet of pool under the current terrace.. the pool must be east to west.. the wind is too great. There should be a building/cabcan on the east side of the pool to block the wind. the questions are does the pool work at 48- 50 feet or at the same level as the bedroom. the road to the library should be shown.. DOUG , and Gary, please make sure that Warwick has the current layout.

Jeffrey, attached please find 3 more concepts for your review. The 3rd one has the pool extending under the terrace.

It looks like the existing residence is at +42.5'.

We are working on 3d images of on of the schemes, for better reference, and for our review Thursday.

I will be in meetings Tuesday morning. Please email me any comments, and I will forward them to the team.

Thanks,

Warwick,

Please see attached Tom's sketch for your use. One print-out package will be on your chair also.

Thanks,
