This is exactly what i mean , it is manurafctued like any other industrial chemical, without the necessary testing.. you need to study, you need to read , you need to look, and see. not just believe. The melatonin in dietary supplements is generally manufactured **synthetically** but is chemically identical to the melatonin produced in the body. Supplements are required to list their source of melatonin if made directly from **plant or animal sources**. If the source is not given, it is assumed to be synthetic. However, neither the U.S. Food and Drug Administration (FDA) or any other state or federal agency routinely tests supplements for quality prior to sale. Consequently, ConsumerLab.com conducted their own tests on melatonin supplements to determine if they met label claims, to make sure they disintegrated properly and ensure they did not contain unacceptable levels of lead, a potential contaminant.

Melatonin is naturally produced in our bodies

For example I took two pills of melatonin last night for better sleep and I woke up 10am this morning so sleepy..... Sooo lazy... Messed up all my day :)

Now on my way to Hamtons!!! Weee! First time this summer!
Have a good day Jeffrey!

You use the internet , cell phone. email, text, wear clothes that contain polyester, shoes that have rubber, shop in stores with electric lights, carry bags made of plastic., travel by air, and subway.. These things are createdby science,, . eating an apple as many effects,, most unknown, taking an aspirin has been studied for years. I understand your reluctance, and as i can see I am patient. JUsT look around you , most of the things you do are related and have been created by people in laborotories. not farmers.
