cheat sheet : committes are a way of life.. business, charity, arts, , govt.. they. from roman times up until the discovery of the scientific K-E , Method Of ( KEMO) committee composition, relied on random criteria, senate- age , arts -wealth, juries- random . , business - diverse interests,, The K -E method of selection allows entities to submit a list of prospective participants. to the K-E, participation test. Afterwards the entitiy is given a proposed composition of committee , a profile that uses the most sophisticated cognitive architecure and proprietary formula, that is able to maximize the overall strength of the committee , by ascertaining that the four necessary types of cognitve processses are adequately represented .This KEMO work is an outgrowth of the Dr. Steven Kosslyn VIP brain work done at harvard.

Sounds good to me!

And I liked the "Vertically Integrated Brain" (VIP) idea...

I'll think about how deception (including self-deception) fits into all of this.

See you soon... and thanks.

I believe I have a great idea . I think you can use this in a way that would make money, get you involved with interesting people, have you work on your traslational cognitive stuff and really make a difference, If that were not enough, you

would also have fun - first you will have to change the categories, into scientific sounding titles.. no one would want to be labled a " reactor ". they will all need to be positive sounding. the Vertically integrated brain, is a nice pun

Hi Jeffrey...

I'm sure you won't like some of this, and I'll be interested to learn why!!!

See you soon.
