Blackstone want to do 50% revenue split for China Outbound Investment after having checked out my background etc.

Nothing has been agreed in writing.

I told them to start with Chemicals - here is their first input.

Subject: Chemicals Opportunities

David,

Per David Bradley's request, attached please a presentation that includes a range of potential acquisition opportunities for Chinese acquirers. The set is broken down into fertilizer, commodity and specialty chemical opportunities.

We would be happy to discuss in greater detail at your convenience.

Best regards,
Chris
