if part of the mission is still to encourage free ideas. and shame gov'ts. i also like even the derivative application, that if the academic work is only marginal did it create a stir in the original country.. were there articles that so and so was rescued, the ripple effect of rebellion. news citing the departure of the academic who now has freedom// The level of academic knowledge- the phrase is too weak. google gives a first approx to decide academic from scholar. i can live with that , if it were the academic rescue fund, if you are a teacher, and in trouble apply. i can live with that. however this has little to do with scholarship, this is to do with rescuing nice people, then change the name to the nice people rescue fund, I can live with that, however to claim that it represents a continuation of taking the great minds out of europe, so that they may flourish in america , appears tenuous at best/ there is little peer reviewed authority to even suggest that the minds you have rescued show substantial promise, except of course from aunt sadies recipe published in the college of nutrition journal.
