To JEE,

As discussed, attached breakdown of expenditure & photos of areas for possible development.

Purpose of :

Wash Pad - is to eliminate the problem of mud & oil residue getting into the septic system at Ranch Central, hence this area would be used to pre wash all Ranch vehicles & equipment. As of date we are using the mechanical workshops as our wash bay.

Pole Barn - will give us the ability to service our larger machinery & equipment, in an enclosed environment year round.

For you review

Regards

Brice
