Summer Greetings

It's hard to believe we're fast approaching the mid-year point of 2010. As you plan ahead for the remainder of the year, we hope you'll take advantage of the following opportunities to learn new skills and build your dynamic modeling expertise:

**"Introduction to Dynamic Modeling with STELLA and iThink"
Colorado Springs, CO – July 12-14, 2010**

Don't miss the last chance in 2010 to participate in our popular introductory workshop. Whether you are new to Systems Thinking or it's been a while since you've used the STELLA or *iThink* software, this two and a half day workshop provides **the** most efficient way to come up to speed with the dynamic modeling approach. We'll draw upon years of real-world experience to help build your skills and facilitate modeling an issue of your own choosing.

**2010 isee User Conference – "Making Connections"
Providence, RI – October 4-6, 2010**

Build new skills, meet experts in the field and share your experiences at the 2010 isee User Conference. The two and a half days will be filled with keynote addresses by Systems Thinking leaders, *iThink* and STELLA application stories and case studies, field-specific round tables, hands-on workshops, poster sessions, and time for networking and open discussion.

**"Intermediate Dynamic Modeling with STELLA and iThink"
Providence, RI – October 7-8, 2010**

Extend your learning in Providence and continue to build your dynamic modeling skills. Designed for experienced modelers or those who have already participated in our introductory course, this two day workshop will take your knowledge to the next level. Faculty will use a wide variety of case studies as vehicles for addressing key dynamic modeling topics and advanced software functionality.

To learn more or to register, visit www.iseesystems.com or call (603) 448-4990. If you have questions regarding content of the workshops or applicability to your situation, please do not hesitate to email Corey Peck at corey.peck@lexidyne.com

Please note that special room rates for the Colorado workshop apply to reservations booked **on or before June 11, 2010**.

We hope to see you in Colorado and/or Rhode Island!

Best regards,

Mark Paich
