---

Hi Sara I agree the 6th floor mechanical area was totally cleaned out then when JE went away all storage from IFI and GM house came over to 71st street Including alot of blue prints .I was against any storage of furniture ,books wrapped in paper or moveing protection in mechanical areas .I would like to remove all storage from that area due to the fire hazard factor. I also requested additional blue print cabnits for the additional blue prints that were sent over and left out on the long table but my request was denied for the cabinet. If you would like i will remove all blue prints of the 65th street property and send back to GM's house to make room for the good 71st prints, and will go through old prints that are no good for old Wexner propities ,LSJ ,11 east 71st Zorro ,and alberto pinto and bring them to the 5th fl For JE & Doug Schouttle review before throwing out. Thanks Richard
