Yes, indeed!...Will call via Lesley tomorrow (Thurs 11/5) -

What are you up to these days? Are you back from Europe? Back in science? We need you!

Just got a paper accepted on autonomic responses to pain and their modulation by music in premature infants...going to the annual Society for Neuroscience meeting in SD next week to present some work on the role of human auditory cortex in intensity processing and loudness perception...got nominated for governorship on the LA Board of the Natl Academy of Recording Arts & Sciences...

And am banging away on the innateness hypothesis from a mathematical perspective:

Simplicity in spatial/spectral (harmonic) relationships in an instant of time and simplicity in temporal (rhythmic) relationships -

If we show that we can attenuate pain-induced heart-rate increases in premies with consonant - but not dissonant - music, or with metrical but not non-metrical rhythms (carried by synthetic heartbeat sounds), we'd have evidence from the brains of babies that are MINUS 1 or more months of age! An Institute summer student and I composed and synthesized piano lullabies and random/metrical rhythms via Sibelius and a number generator, and have a Logic Studio setup up and running...we sent FSN a proposal on this one last year. The Grammy Foundation awarded us a grant but cut the budget from \$40k to \$25k because they were short on funds. The Doris Duke Foundation said they loved the proposal but are/were under water...

And trying to find the time needed to finish my book proposal for ICM Talent - an "advance on an advance" - maybe a Guggenheim Foundation grant? Otherwise, that time has to go into seeing my thousandth stroke patient, hundredth MS patient, etc. My book agent, Kris Dahl, who has a nice stable of NY Times top-20 fiction and non-fiction writers, thinks I can get upwards of 100-150k as an advance, given my background and credentials. Getting tapped by the senior commissioning neuroscience/psychology editor at Oxford Press to do the first Cognitive Neuroscience of Music textbook won't hurt either. For that honor, Oxford gave me a whopping 2.2k advance!

Peace & Love,
Mark
