Jeff,

I know this is difficult to bear, but please understand that because information pipelines have become basically free, we have rapidly gone from an Age of Information into an Age of Misinformation and downright Disinformation, where people can propagate anything that they wish very quickly. There is no Truth police (Mad magazine is no longer socially relevant), no filters anymore. So, they can just put this stuff out there, and they can do it in a way that is quite pernicious and anonymous.

To stop them interfering with your wiki page, which they were constantly doing, by removing our edits, we had to create programs to track their ip addresses, build a program inside wiki, and actually block them. This is NOT a setting on wiki. This was programming work.

I told you it is rough out there. We are not doing anything in a perfunctory way, although I DO understand that some of the things that we are doing would not be at all agreeable to you, like a facebook page. I KNOW you don't want any of this! and I know why it is abhorrent to you. I KNOW you just want to fade into background again, but it isn't possible anymore in today's age. We are doing the very best we can to counter it. I wouldn't be up in the middle of the night working on your behalf otherwise. The replacement of the mug shot, etc., on the top of the wiki page was a big deal as it was the first thing you saw. Most of that crap is gone now. Try to see some of the positive results that we have worked so hard on. It isn't easy.

Speak to you tomorrow. I have that uber hacker coming over tomorrow and we have some more things we are pulling out this week in this department.

Cheers,
me

And, just so that it is clear, I removed only the positive facebook site that we created last night. I could not remove the other facebook sites created on you, which were nasty, which this page was going to knock out. Now, on facebook, those sites will come up, and there is nothing to replace them.

you want me to remove it? Really? It only has links to your website and photo. Did you look at it?

I don't quite understand why you are so against it, as it is minimalist and you don't have to do anything with it, and it would knock stuff out, having just your photo, and links to the websites. NO friends listed, no friends added, nothing, and would replace the one currently up there that is against you.

But, if you want it gone, it will go right away.

I hope you are happy with what we managed to do with the wiki page, which was quite a task of hacking.

We created a facebook page for you with very specific privacy settings, and showing information and links that only we want to show.

To view it, and see it how the public will see it, and we have a certain hacking program, which will boost it to the front page of google, knocking out some of the other bad stuff. Just have your assistant search under Jeffrey Epstein when she is logged into her FB account. It will take a while for the search engines to find it. If she can't find it this way, have her do it under a false email account search that we set up:

jeffreyepstein7@gmail.com

No one can post anything on this site. And, it contains only the information, photo, and other stuff that we wish people to see.

Also, while she is there, and I think she is friends with me on facebook, go look at my own profile page, and check out the photos from our Celebration of Mind event. you might find them fun.
