Jeff,

It would be my very strong suggestion to add your website prominently to your electronic signature (as it is the best thing and most significant positive presence out there on you now), and additionally, I would have anyone, who is operating under your auspices, also add it to their electronic signature.

www.jeffreyepsteinscience.com

In addition, as this is all under "your name," I would suggest you carefully go through each page, and make written specific notes of any egregious errors or mistakes, and we will correct them immediately. I do not want this site to look badly on you in any way through either an inadvertent mistake or omission. We don't want you to be misrepresented in any way. Only you can do this.

Again, more material is going up. The content has been created. I believe that the tab for testimonials will go up today, Project Zero, and GoodWork Project too.

More photos, etc.

Thank you.
