I just spoke to Cheri again and the major concern her father had was that the run to PR for the General II is very hard and the risk of break down is great. This is not a vessel that makes such long runs.

She said that her dad did some mechanical work on the Commander and i/s/o getting paid he asked that they make the run. It is set for th 7th which is the date that Igala gave to her. She could do it next week but we would not be ready to receive the trees.
