To: Nick Lambros <[REDACTED]>

Nick,

unfortunately I will not be able to provide a 3D demo until the week after CEDIA. Yesterday I mentioned that another demo may have been canceled freeing up the projector for you to use next week, however I have just found out the demo was not canceled just moved to an alternate location due to customs issues at the Canadian border. Can you ask your client for a demo date on or after October 4

th.

These 3D systems are in constant demand and it seems we can't build them fast enough. Please let you client know how popular this item is and it's truly worth the wait to get the opportunity to sample one. He will definitely want to buy it after he sees active 3D technology.

Ken Eagle, CTS

Midwest Sales Manager
Digital Projection Inc.
