Subject: Reversed perspective Cubes

Date: Mon, 17 May 2010 21:46:41 +0000

Attachments: Randi_cubes1.jpg; Randi_cubes2.jpg

From a distance the cubes appear convex or solid colored cubes, and as you walk around them, they appear to float and turn in very odd ways (due to the reversal of motion parallax), which is very bizarre. Then, when you go up to them, you see that they are not solid, but the inside is painted like the outside, which is very surprising.
