Robert

I saw your proposed bench of corian

do you think it's close enough to the white glass(20 week delivery after shops,\$90,000 uninstalled) that Jeffrey would consider it for the walls as well?

we could save \$30,000 to \$40,000 and three months time as corian is bought in sheets and fabricated on site.

I would appreciate you comparing samples to see if corian is a viable alternative,another issue is we haven't determined how to get the glass to be non slip on the floor surfaces
