Attachments: Robert's_Sketches_-_Tub_Alcove.pdf

This is the sketch I did for your tub outside your bathroom. There will be doors bifolding elegantly of course that will allow you to shield sun and rain. The top of the walls has the detail I sketched and that you like which allows air to flow.

All can be built in Ipe wood. A wood close to mahogany and rosewood. It is good for outside. We can get samples.

Working on the general layout of the pool and Cinema. You'll get images tonight or tomorrow latest. Not easy.
