Important Announcement from Toktumi and Line2

Free your iPhone from bad reception and high cell bills

You can now pick a number and start your 30 day free trial

Dear Story,

We are pleased to report that we are once again able to accept new Line2 customers. We've added new security features, installed several hi-power servers, and added thousands of new phone numbers. Our team worked around the clock to make this happen and I hope you enjoy the fruits of their labor!

Creating your account is easy and fast.

If you deleted Line2 from your iPhone, you can download and reinstall it for free. Once you start the app, select "Get a New Number," fill out the screens, and you are done. You can immediately start making and receiving calls.

Your 30 day free trial starts once you activate your account.

Your 30 day free trial will start on the day you signup. During your trial you can receive calls, place calls to the US and Canada, and access all the features. (International calls are not allowed during your free trial.) If you like the service, you can activate any time for just \$14.95/month, which includes unlimited US/Canada calls and international calling at ultra-low rates. It also includes unlimited conferencing, call transfers, and access to all of Line2's features. You can learn more about these features by [watching these screencasts](#).

Port in an existing number for free.

Toktumi and Line2 also offer free number ports, so if you don't like your assigned number, we can port an existing number into our system, including landlines, cell numbers and 800 numbers. Please wait until your trial has ended before attempting to port a number, and remember that Line2 does NOT support 911 emergency calls.

Our number one goal is to provide our customers with excellent service. We apologize for our rough start and the inconvenience we've caused, and we won't let it happen again. Thanks again for sticking with us, and we hope you enjoy our service!

Take care,

Peter Sisson
Founder/CEO
Toktumi, Inc.

About Toktumi

Toktumi provides a service that ties employee laptops, cell phones, and other phones into a unified communications system that allows small companies to present a professional image and communicate more effectively with customers. It targets the fastest growing type of small business: virtual offices and home offices. These companies use technologies like Toktumi to get the benefits of an enterprise-grade phone system and online collaboration tools without needing to purchase and install any equipment or spend lots of money. Employees can work anywhere and still be just as effective as if they were all together in one office
