I googled for pricing on the zBoost YX610 Repeater. Three shopping results show:

Amazon.com - \$603.99
CellularAccessory.com - 489.99
OneClickMX.com - 589.99

I don't have the model number for the 80db and 10db solutions that Sawyers quoted. Pat was on the roof and called the company from there with the model number. I called the company and asked about a 80db dual band amplifier and was quoted "about 9 grand." Rich is back over at the house tomorrow. I'll run upstairs and get the make and model number and maybe we can price it out more efficiently.

Wm
