---

Last Monday I was at Gala/Dinner in NYC. Majority of people were involved in Science in one way or another (particularly in NYC) and I am sure we both know many of them.

Although it is not an A list for NYC events and it did was not that fun, it did have many good people from scientific field. A host Ellis Rubenstein (whom I think you met) is my very good friend.

Please let me know if there is anyone you would like to meet from that list.
