---

Jeffrey,

For your review and approval please find attached photos of:

1. Actual rubber stamp with coral stone texture
2. Stamped coral stone concrete example
3. LSJ coral stone tile light tone
4. LSJ coral stone tile tan tone
5. Concrete color chart

I would like to try colors which are subtle and light in tone, similar to the existing tones of the installed tiles, see attached, possibly the Sandstone color or the Mesa Buff color.

I am awaiting a set of actual concrete color samples from this company so we can have a more accurate reading of color rather than this chart.

Please review the chart only for general reference and let me know if there are specific colors or a tonal range, other than what I suggest, which you would like to see for our mock up.

May I proceed with ordering the rubber stamp?

Regards,

Silvina

Jeffrey,

At the airport with Brice to PR to meet potential consultants. Will forward photo of coral stone stamp before I purchase. I would like to do smaller color samples for your review prior to the bigger mock up. I will forward range of colors I am thinking about for your input.

Silvina

Jeffrey,

With your approval, we would like to proceed with a mock up of the stamped concrete road design at the turnaround court below the Kitchen stair and a small portion of the road leading up to it as shown in the photos.

This court has been a difficult one for the vehicles to maneuver and the triangular stone wall is always constantly banged up.

May we proceed with demo and the mock up in this area?

Regards,

Silvina
