To JEE:

All storage containers have been emptied & all usable/dry items have been inventoried.

As of date there are 3 structural sound non AC'd 20ft containers & the 4 AC'd 40ft containers holding the Millwork.

Attached 2 photos showing containers which are no longer structural sound & containers holding the Millwork containers

Attached photos show items removed from containers, which are either damaged, have missing parts or have been badly stored and non operational, would recommend disposal.

Please advise

Warmest regards

Karen
