Attachments: LSJirrigationsystem.doc; LSJirrigationretrofit.xls; LSJirrigationcentralizedcontrol.xls

Would recommend proceeding with retrofit of irrigation and let Adam have the crew for a week.

Brice

Please see attached. Please let me know if it goes through okay. Also, I wont know any discounts until order is placed...typically 5.25-8.75% off of list price if ordering in bulk or over \$15k in material.

I can have all irrigation materials onsite in 16-21 days. I may have left out some items but I did check out your inventory so I have good idea of what is already onsite. I would be working with 1 or 2 of my employees to complete project.

I can start immediately and I can work around current VI projects. As for landscape/ new designs/landscape maintenance/ideas I have all of that on disc and in binder, but I would like to see Curtis early in week and get his input on gardens. Also need to spend an entire day with your garden crew to get feel of their abilities and knowledge. I agree with you that it best to promote someone from within to take the reigns. I can offer professional oversight, plant/material purchasing and sourcing, and landscape/hardscape design whenever required. Hope all is well and let me know if u need any other material or info immediately. Thanks again and Im very excited at future possibilities with LSJ.
