Subject: Banquette Drawing for Approval

I am attaching a drawing of the Banquette with indirect lighting behind. The banquette has two pullout shelf/drawers for DVD players, etc. The seats may be lifted up to remove for electrical access through the entire base assembly. When put in place the seats will "register" and stay in place.

I am sending overnight a package with hard copies of this drawing. Included in it will be the Finish Sample Submittal, and this time we will have it right. As soon as you can verify the color as Chantilly and give me approval, I can start finishing the Kitchen.

You may have already received (or will shortly) a package with Countertop Drawings to forward to your Caesarstone Vendor. Included in the package is a CD that has DXF files of the individual parts on it. If he cuts exactly from the DXF's his counters will fit my cabinets perfectly. Please forward the CD to him also. He may or may not be able to utilize it, but he could get by with the working drawings if not.

I am on track for the 20th, but will really have to hustle on the Banquette. I am positive we can be ready to start loading a container (if dropped here at our plant) on the 20th of December. Please have the container people allow us at least 8 hrs to pack safely.

Also, if we do plan the container for the 20th, I need to make plans for when my two installers will arrive. We are sending Paul Meadows, and Wayne Higdon. That is our "A" team. I would need to book flights and make hotel arrangements. Maybe they should stay near the dock, to walk to the ferry each day? I'm also hoping there are available rooms this time of year.
Kitchen Cabinets= Sure Thing Banquette= Very Likely

Thanks for all your help
Kirk
