Associated with an Origins of Life Workshop co-organized with Nobelist Sid Altman, to be entitled The RNA world revisited, we are now planning to have a public panel discussion, as we did recently for the Origins of Morality workshop. The panel was highly successful, attracting 2000 people (you can find it linked on the origins website [www.origins.asu.edu](http://www.origins.asu.edu)). This public panel, hopefully in Gammage again, will be entitled: What is Life and How did it begin?

Tentative panelists include you, Richard Dawkins, Freeman Dyson, Sid Altman, and several others.. it should be fun., and the workshop, to take place FEB 11-13 will cover 4 topics.. 1. possible chemical alternatives to standard metabolism. 2. Why the RNA world: metabolism vs reproduction as driver of life, 3. What was the actual ancient environment, 4. what to look for?

I am hoping you would be willing to attend and be a part of the panel and the workshop. We could cover all expense of course, and it should be fun.

So, whaddy say?
