Mr. Epstein in order to complete the 5th floor kitchen a floor needs to be picked first, is it carpet ,vinyl tile or ceramic tile ? The Kitchen floor measurement is 10 ft 6 inches X 6 ft. The appliances missing from the original kitchen are 1)Gas Range the opening is 30 1/2"wide X 25 1/2"d X 36"high 2) The Dish washer opening is 24" wide X 35" high x26"d if a dishwasher is not replaced a cabinet needs to be built by a carpenter to close the space. The refrigerator space is 35" wide X 27 1/2" D X 67 3/4"high.I found all the appliances on line at PC Richards to fit the openings in the cabinets . I have pictures and model numbers the Frigidaire Range is Model#FGF337GC , \$649.98 The Refrigerator is a Frigidaire Model FRT18HS6JS, \$679.97 The DishWasher is GE Model GSD4060NSS .\$419.98
