For what it's worth, that's how I've always kept them straight in my head. Also for what it's worth, Perl 6 will mostly default to strict but make it easy to switch back to lax. Larry

Do you copy? As of Perl 5.8.7, B<UTF-8> means strict, official UTF-8 while B<utf8> means liberal, lax, version thereof. And Encode version 2.10 or later thus groks the difference between C<UTF-8> and C"utf8".
