I like the idea. But will defer to you , if you think it is counterproductive. (I try not to have meaningful opinions about things I know little about.) In the Middle East, new players in saudi, MBS stronger that weaker. soon to be new ones in Israel. Defense cos , UN . Ag, dem committees.here . ITs great. The chessboard, has many new pieces.

Michael Cohen was charged with exaggeration , bank fraud. . most people forget that exaggeration is a crime. When it has to do with loans . It comes in many forms. Value of assets. Number of condos " sold " . (trump soho).

Nyt Specifically, investigators are examining loans paid to Cohen’s businesses by two New York banks in an attempt to determine whether Cohen “misrepresented the value of his assets” while obtaining them.

Part of my dialogue this morning from Noam - Cultures unfortunately can be swept by craziness. Nazism for example. Or the Great Awakening. We're in one of those phases now. If there's a charge, it's true, in fact True. Any response is "mansplaining," another power play, reinforcing the charge. You've seen I'm sure what happened to Lawrence. Full and complete response, amounts to zero. Isn't even considered. It's like trying to discuss rationally with religious fanatics.

On consciousness, my suspicion is that we'll never do much better than Russell's picture: what we understand with highest confidence is our own immediate conscious experience. The rest of our intellectual efforts (science especially) are an attempt to make sense of that (and in the course of doing so, instructs us that our experience is a construct of our internal modes of cognition acting on an external world that we (naively?) assume to exist. And it also tells us, I think, that consciousness is a thin and superficial fringe of an internal mental life that is inaccessible to introspection.

Think about trying to define “ culture “. You know it exists , but is outside trying to “ measure “ measure is science. . culture has norms memories. Transmitters (media). It has tribes, - self. That fight for survival. It can't be examined by reduction , ie can't find exactly where it is located

Consciousness is a construct of the brain that allows it to tell itself a story that helps it survive. The important factor here is that when someone asked why you did . x. . the correct answer is I have no idea. but the human answer requires a story . Why did you choose to sit on the sofa ? Why did you walk into the kitchen. Why did you put your right shoe on first . Correct answer. , no fucking idea. , however each elicits a story that purports with ones ideas of what the answer should be .
