# AIRSHOW MOBILE 2 – DEMO MODE INSTRUCTIONS

1. Download the app 'Airshow Mobile 2' from the Google Play or Apple App store and launch the app.

2. You will see the splash screen. It will stay on this screen for 10 seconds while it searches for the Airshow server software. It will not find the server software and time out. In an actual system it will connect much faster.

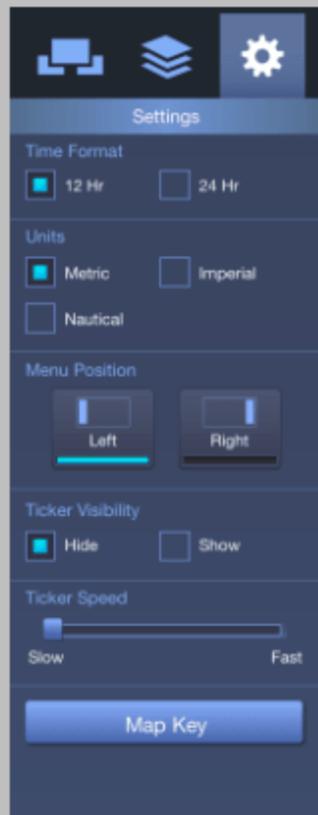

3. After the App times out it will show this screen.

4. Open the menu to the Settings page by touching the handle button and then selecting the Settings page. See below.

5. Select the following settings: 12Hr, Metric, Menu position LEFT, Ticker visibility HIDE, ticker speed Slow (all the way to the left).
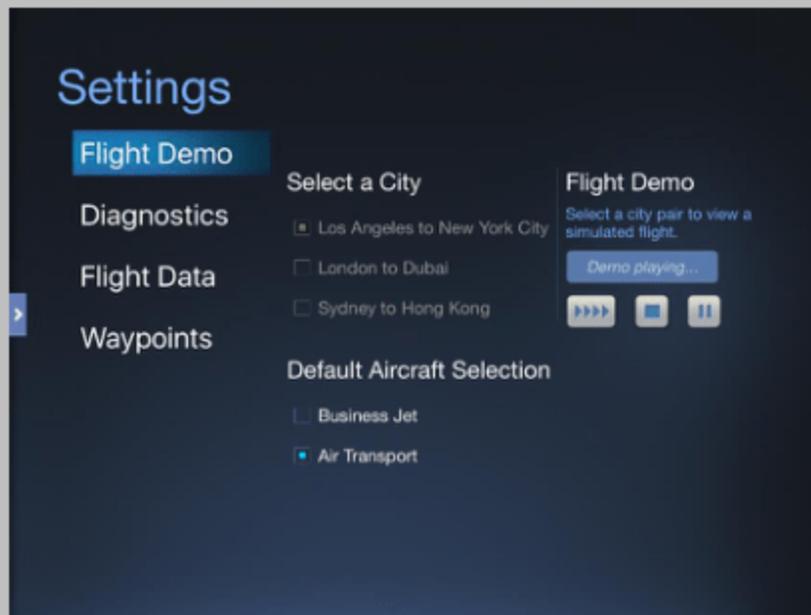

6. Triple tap the top Settings cog icon.   ⚙

7. Once the Demo mode is open, select one of the 3 preloaded flights.

8. Press "Start Demo".

9. Select a map view from the main menu to start using the app.

10. If desired, turn the Ticker Visibility back to 'Show' under settings.
