Concept Ideas  Existing Reference

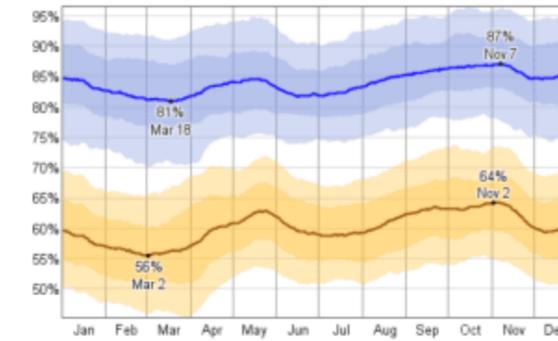

Great Saint James Island Weather & Location

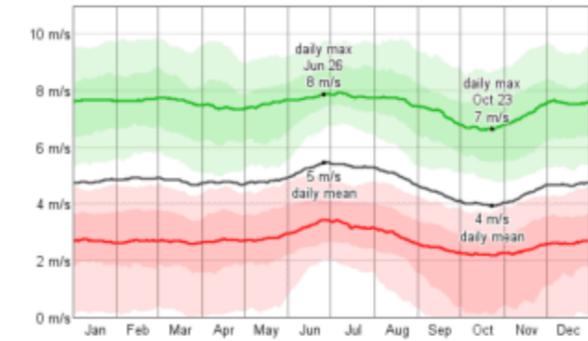

Cloud cover types (%)

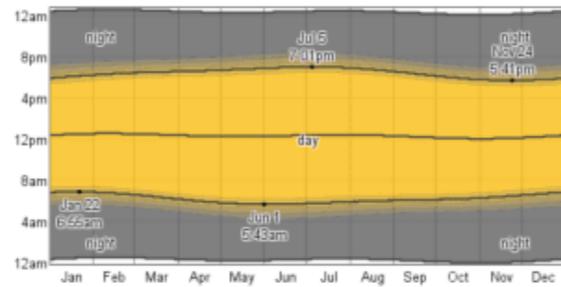

Median cloud cover (%)

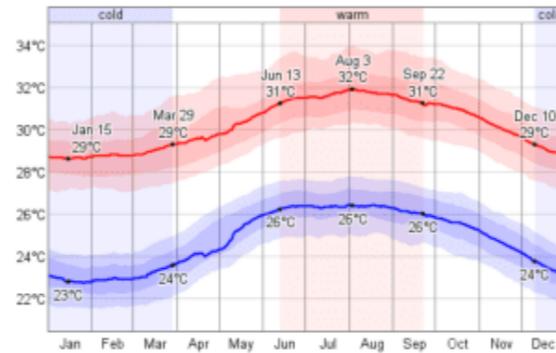

Relative humidity (%)

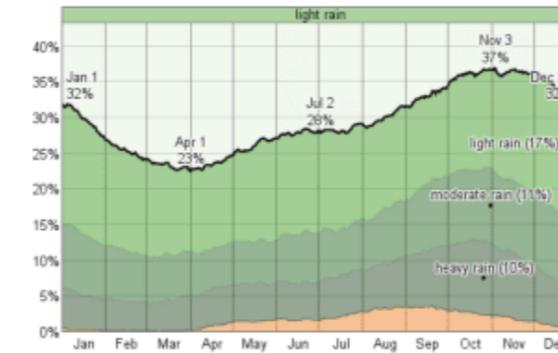

Wind speed (m/s)

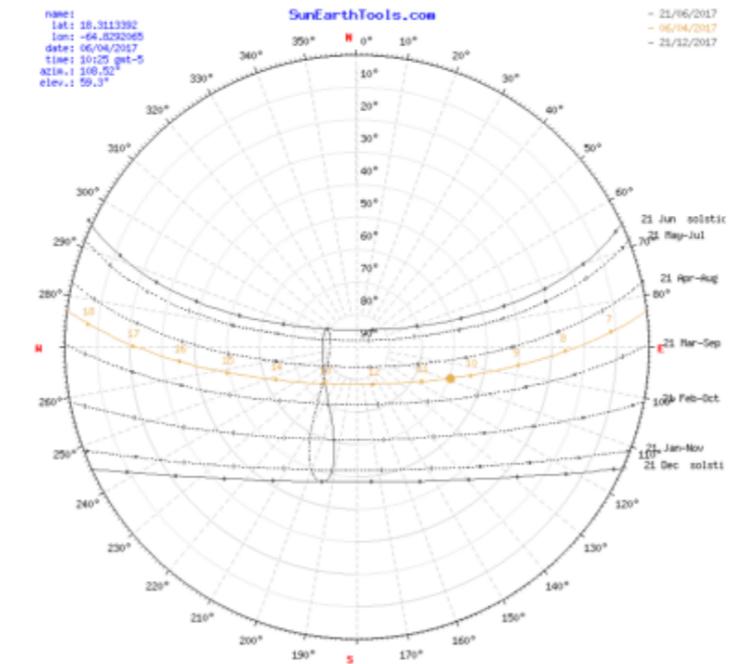

Daily sunrise sunset with twilight (hours of day)

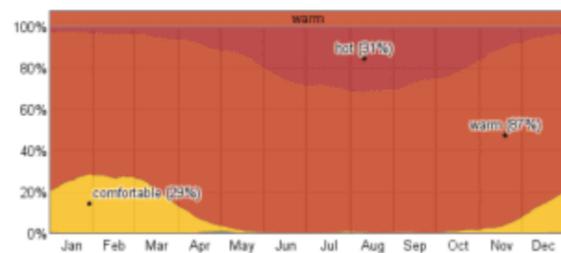

Daily high and low temperature (°C)

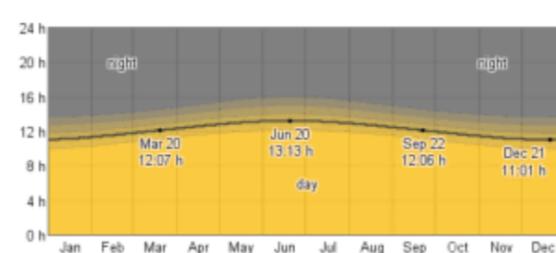

Probability of precipitation at some point in the day (%)

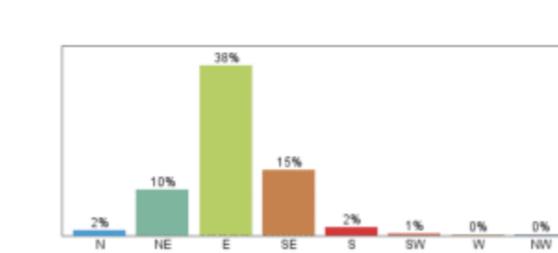

Sun Path

Fraction of time spent in various temperature bands (%)

Daily hours of daylight and twilight (h)

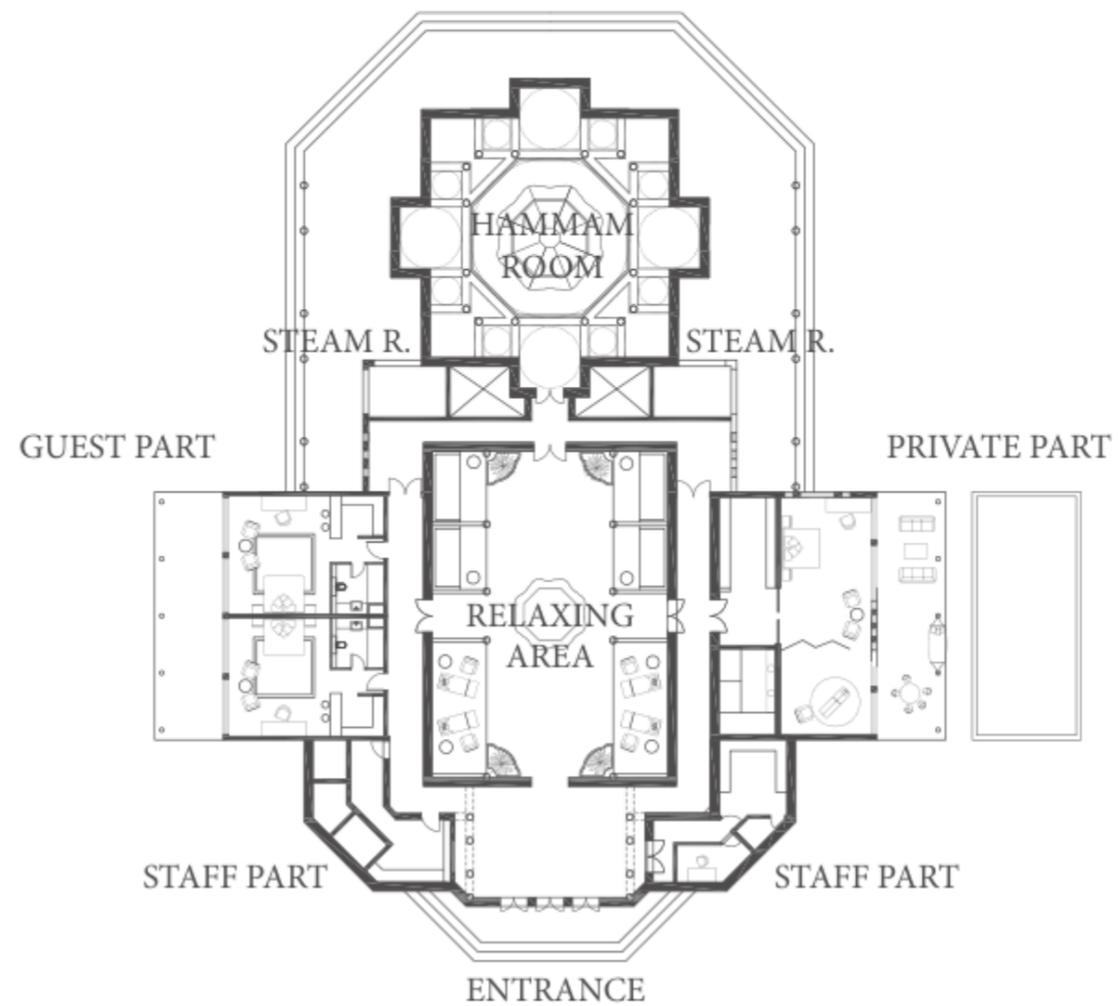

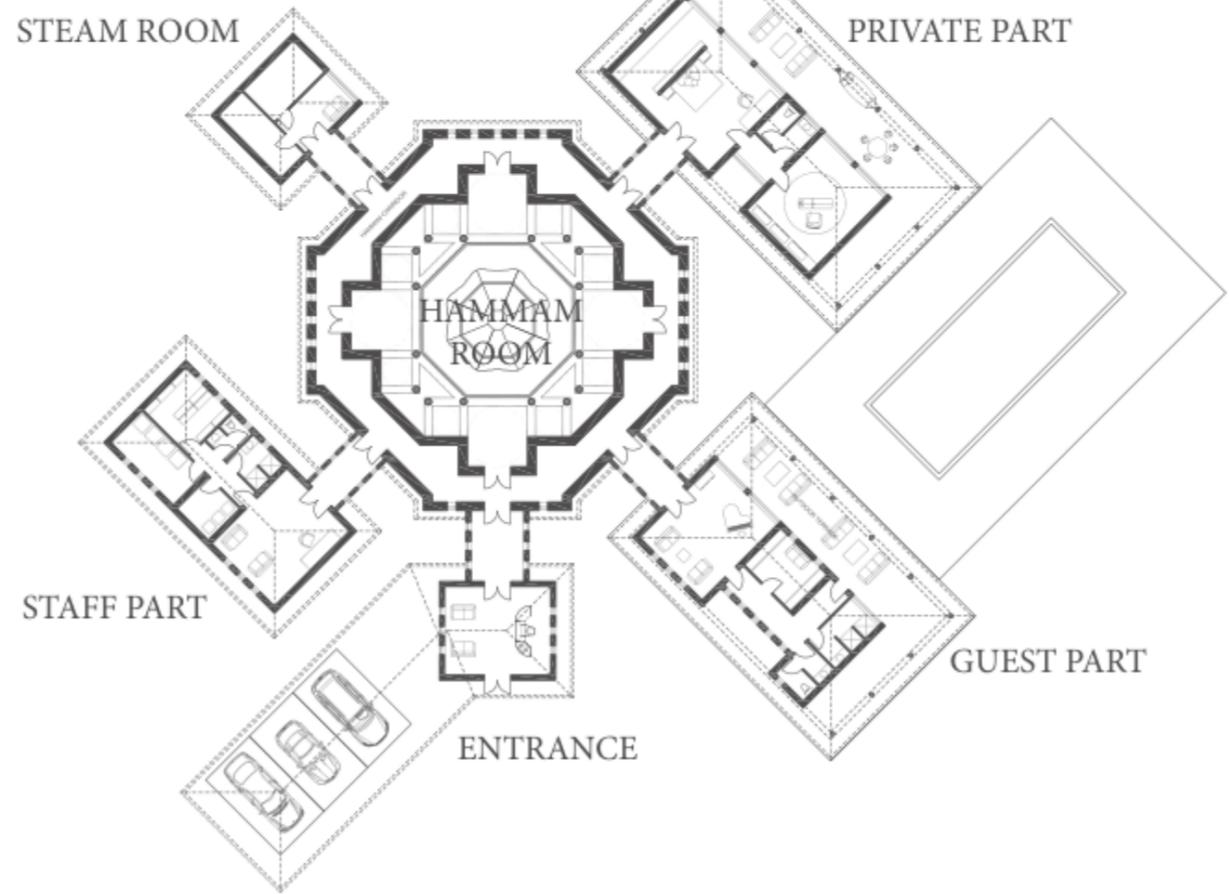

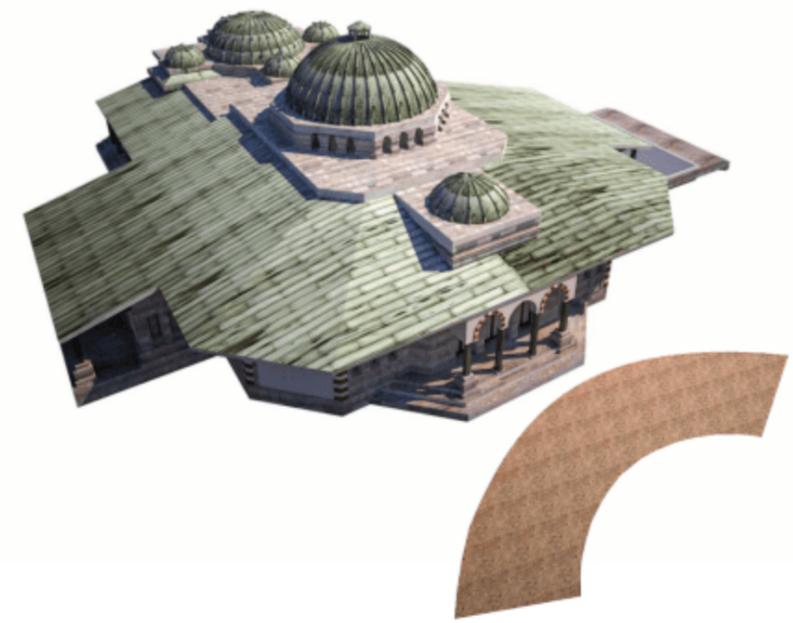

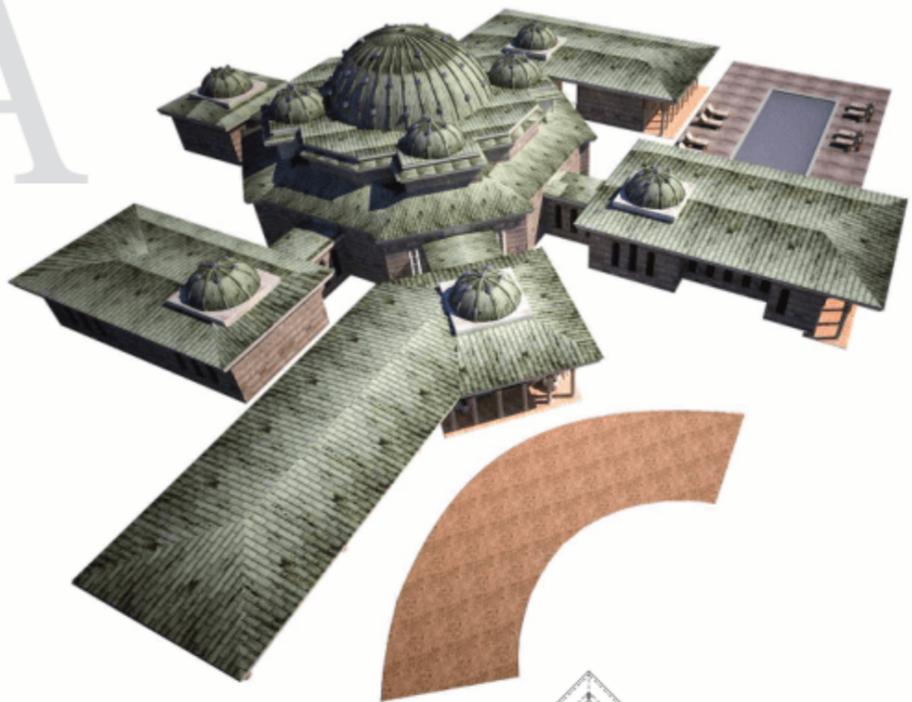

Wind directions over the entire year (%)

A

Option A Option B

B

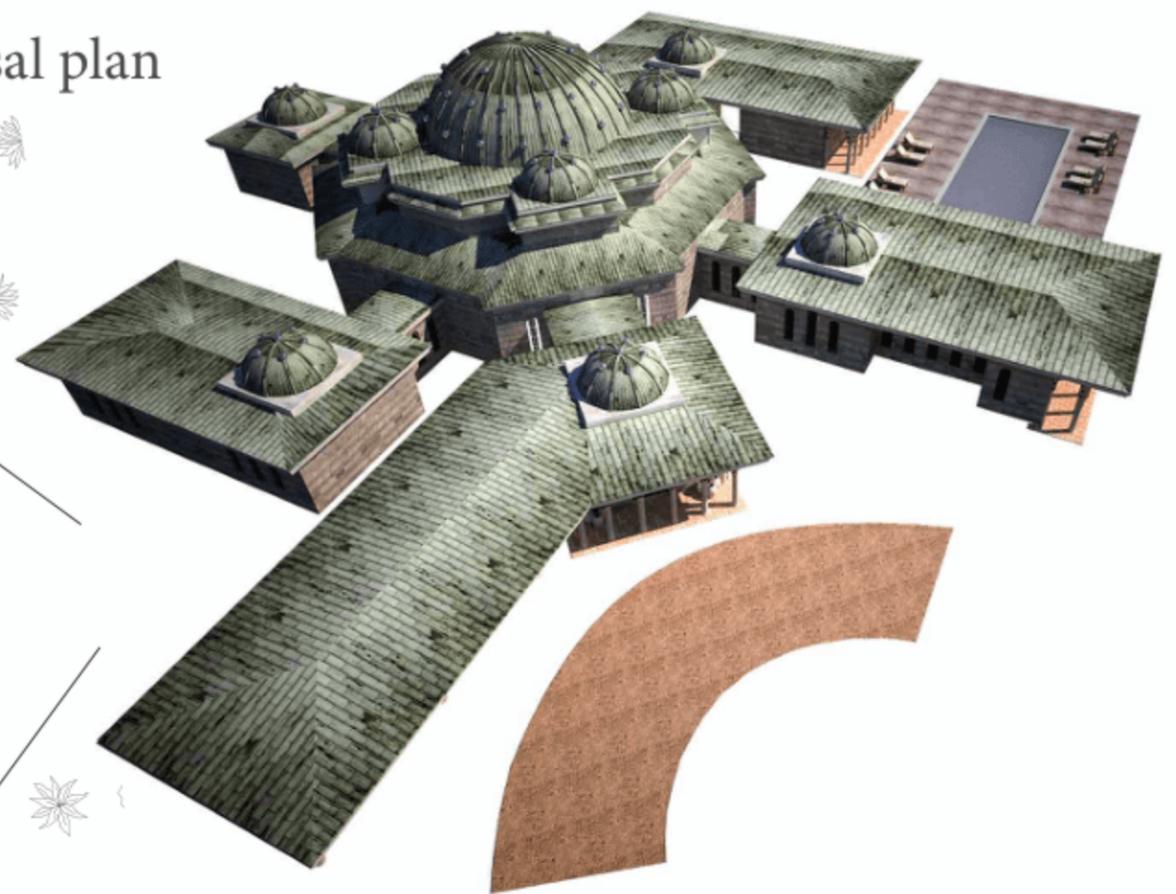

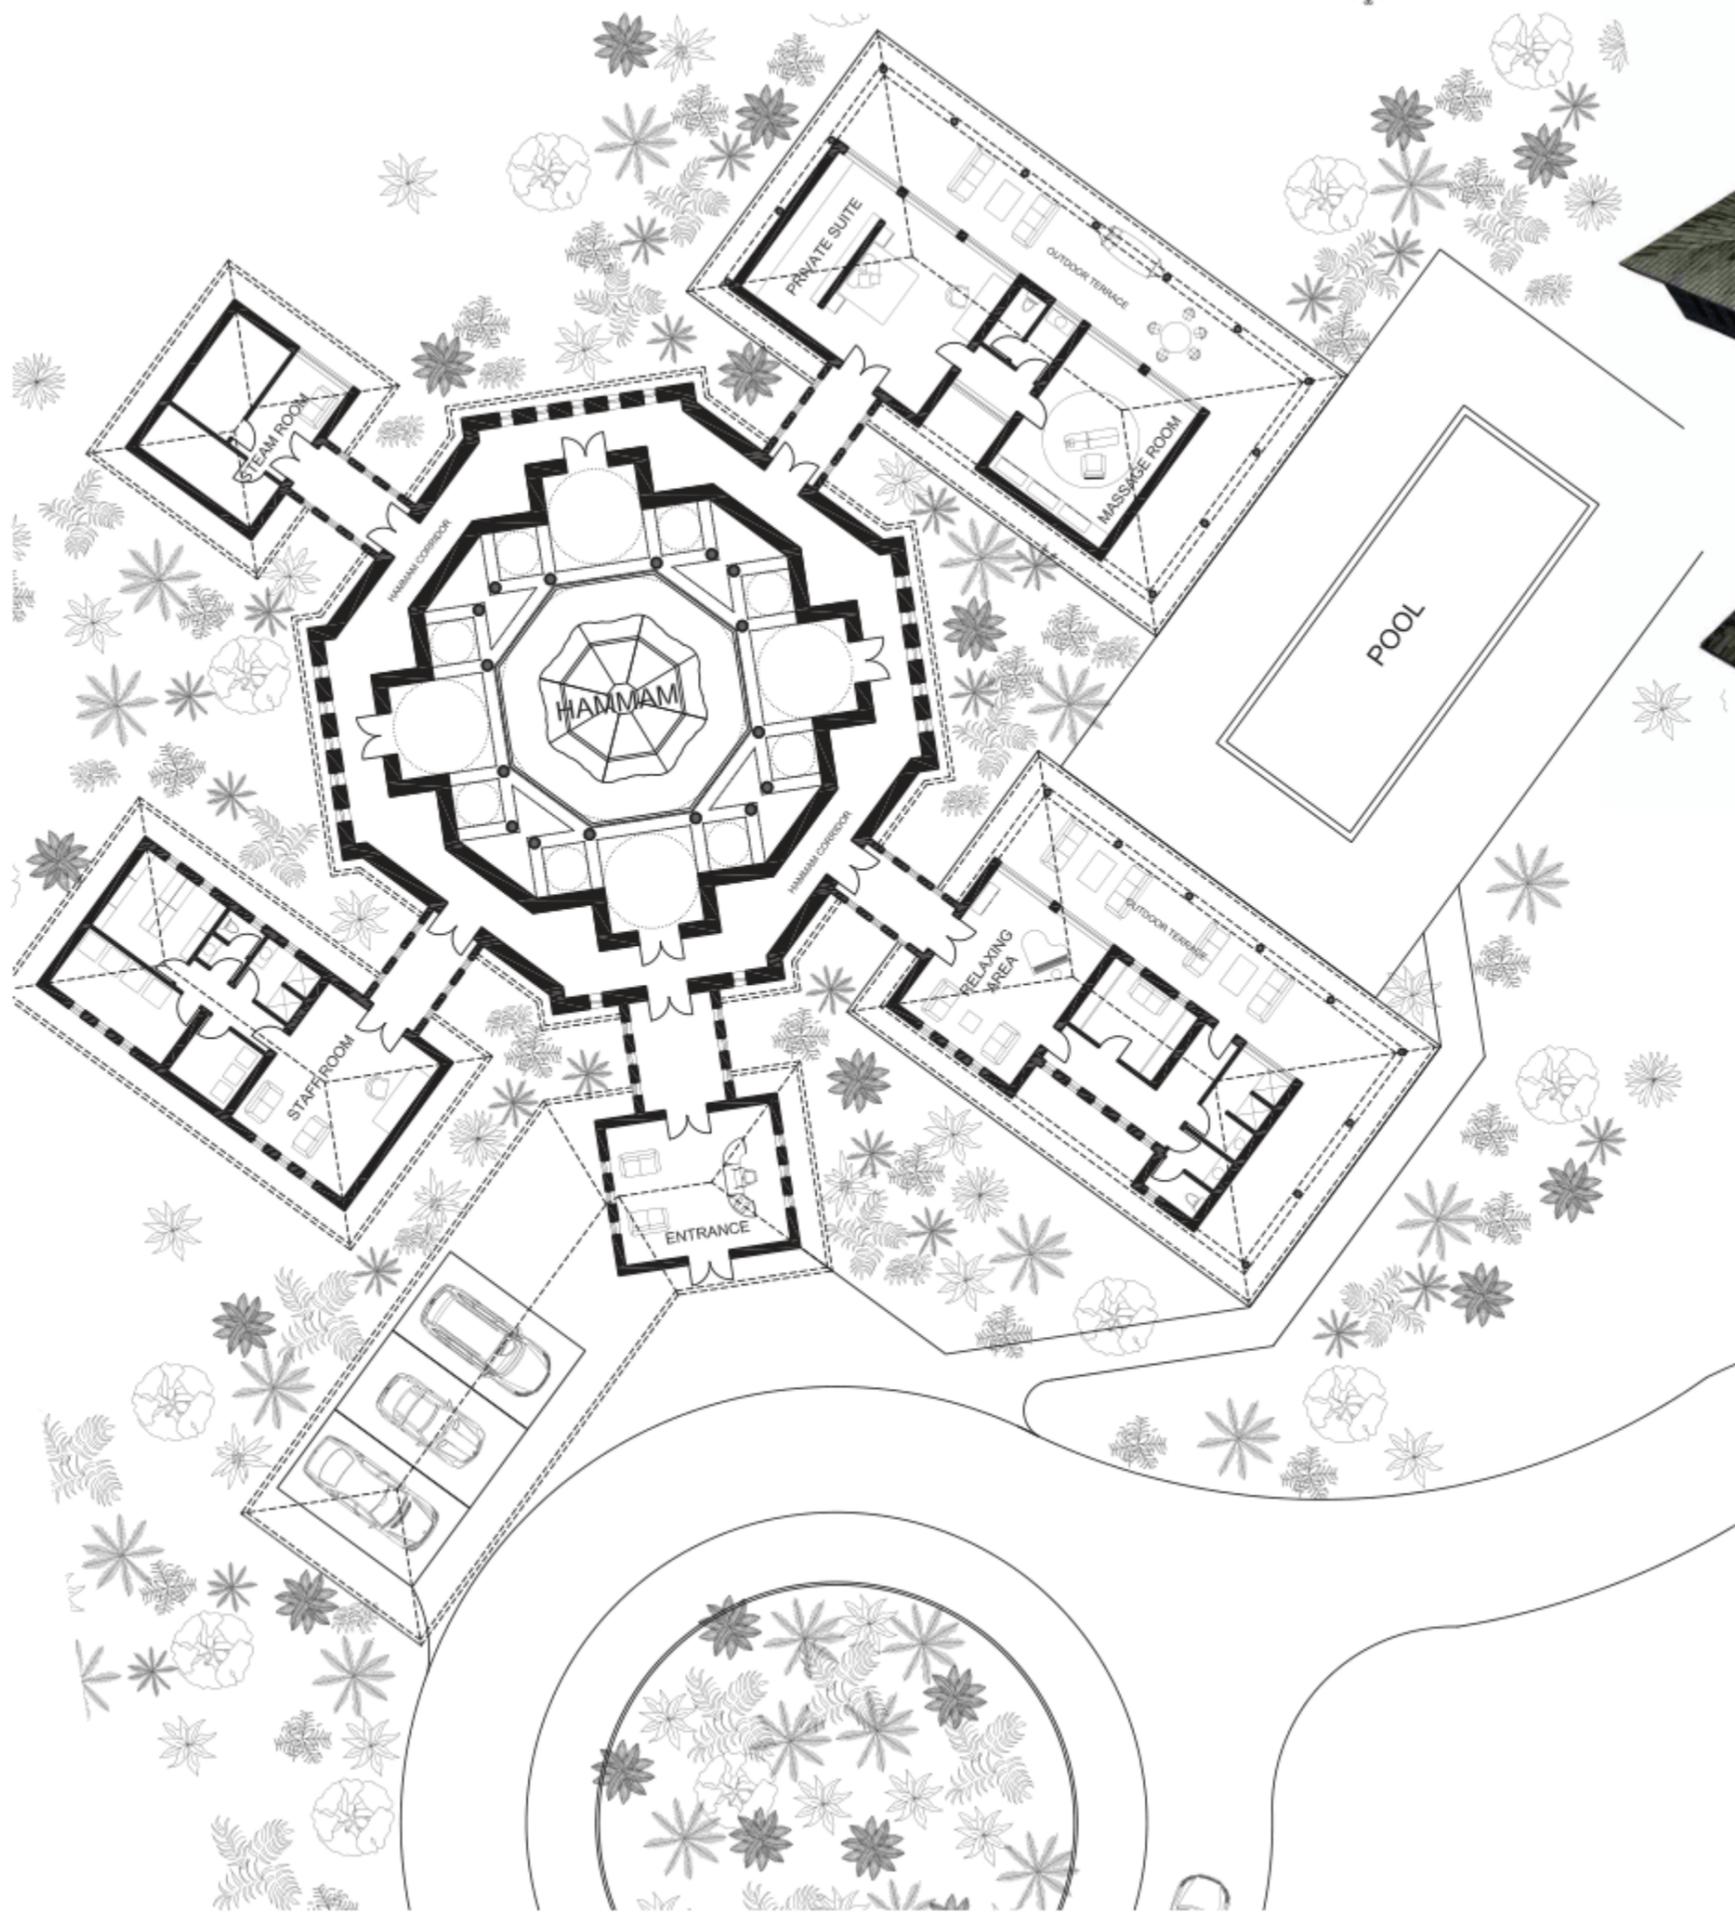

Representing the scattered concept, option A is a composition of different building spaces connected mainly via separate corridors to the main core space: the Hammam.

Represents the more compacted space. In contrast with option A, option B is centralized around the relaxing area implementing the traditional flow through Turkish hammam: entering, changing, relaxing to warm up the body temperature, and then moving to the hammam space.

This option expresses a complex series of walkways through the spaces and embraces many small outdoor greenery spots that can be viewed while moving from one space to another.

This option has mainly one corridor that flows around all spaces with the possibility of controlling the circulation via located doors points.

Option A Proposal plan

A

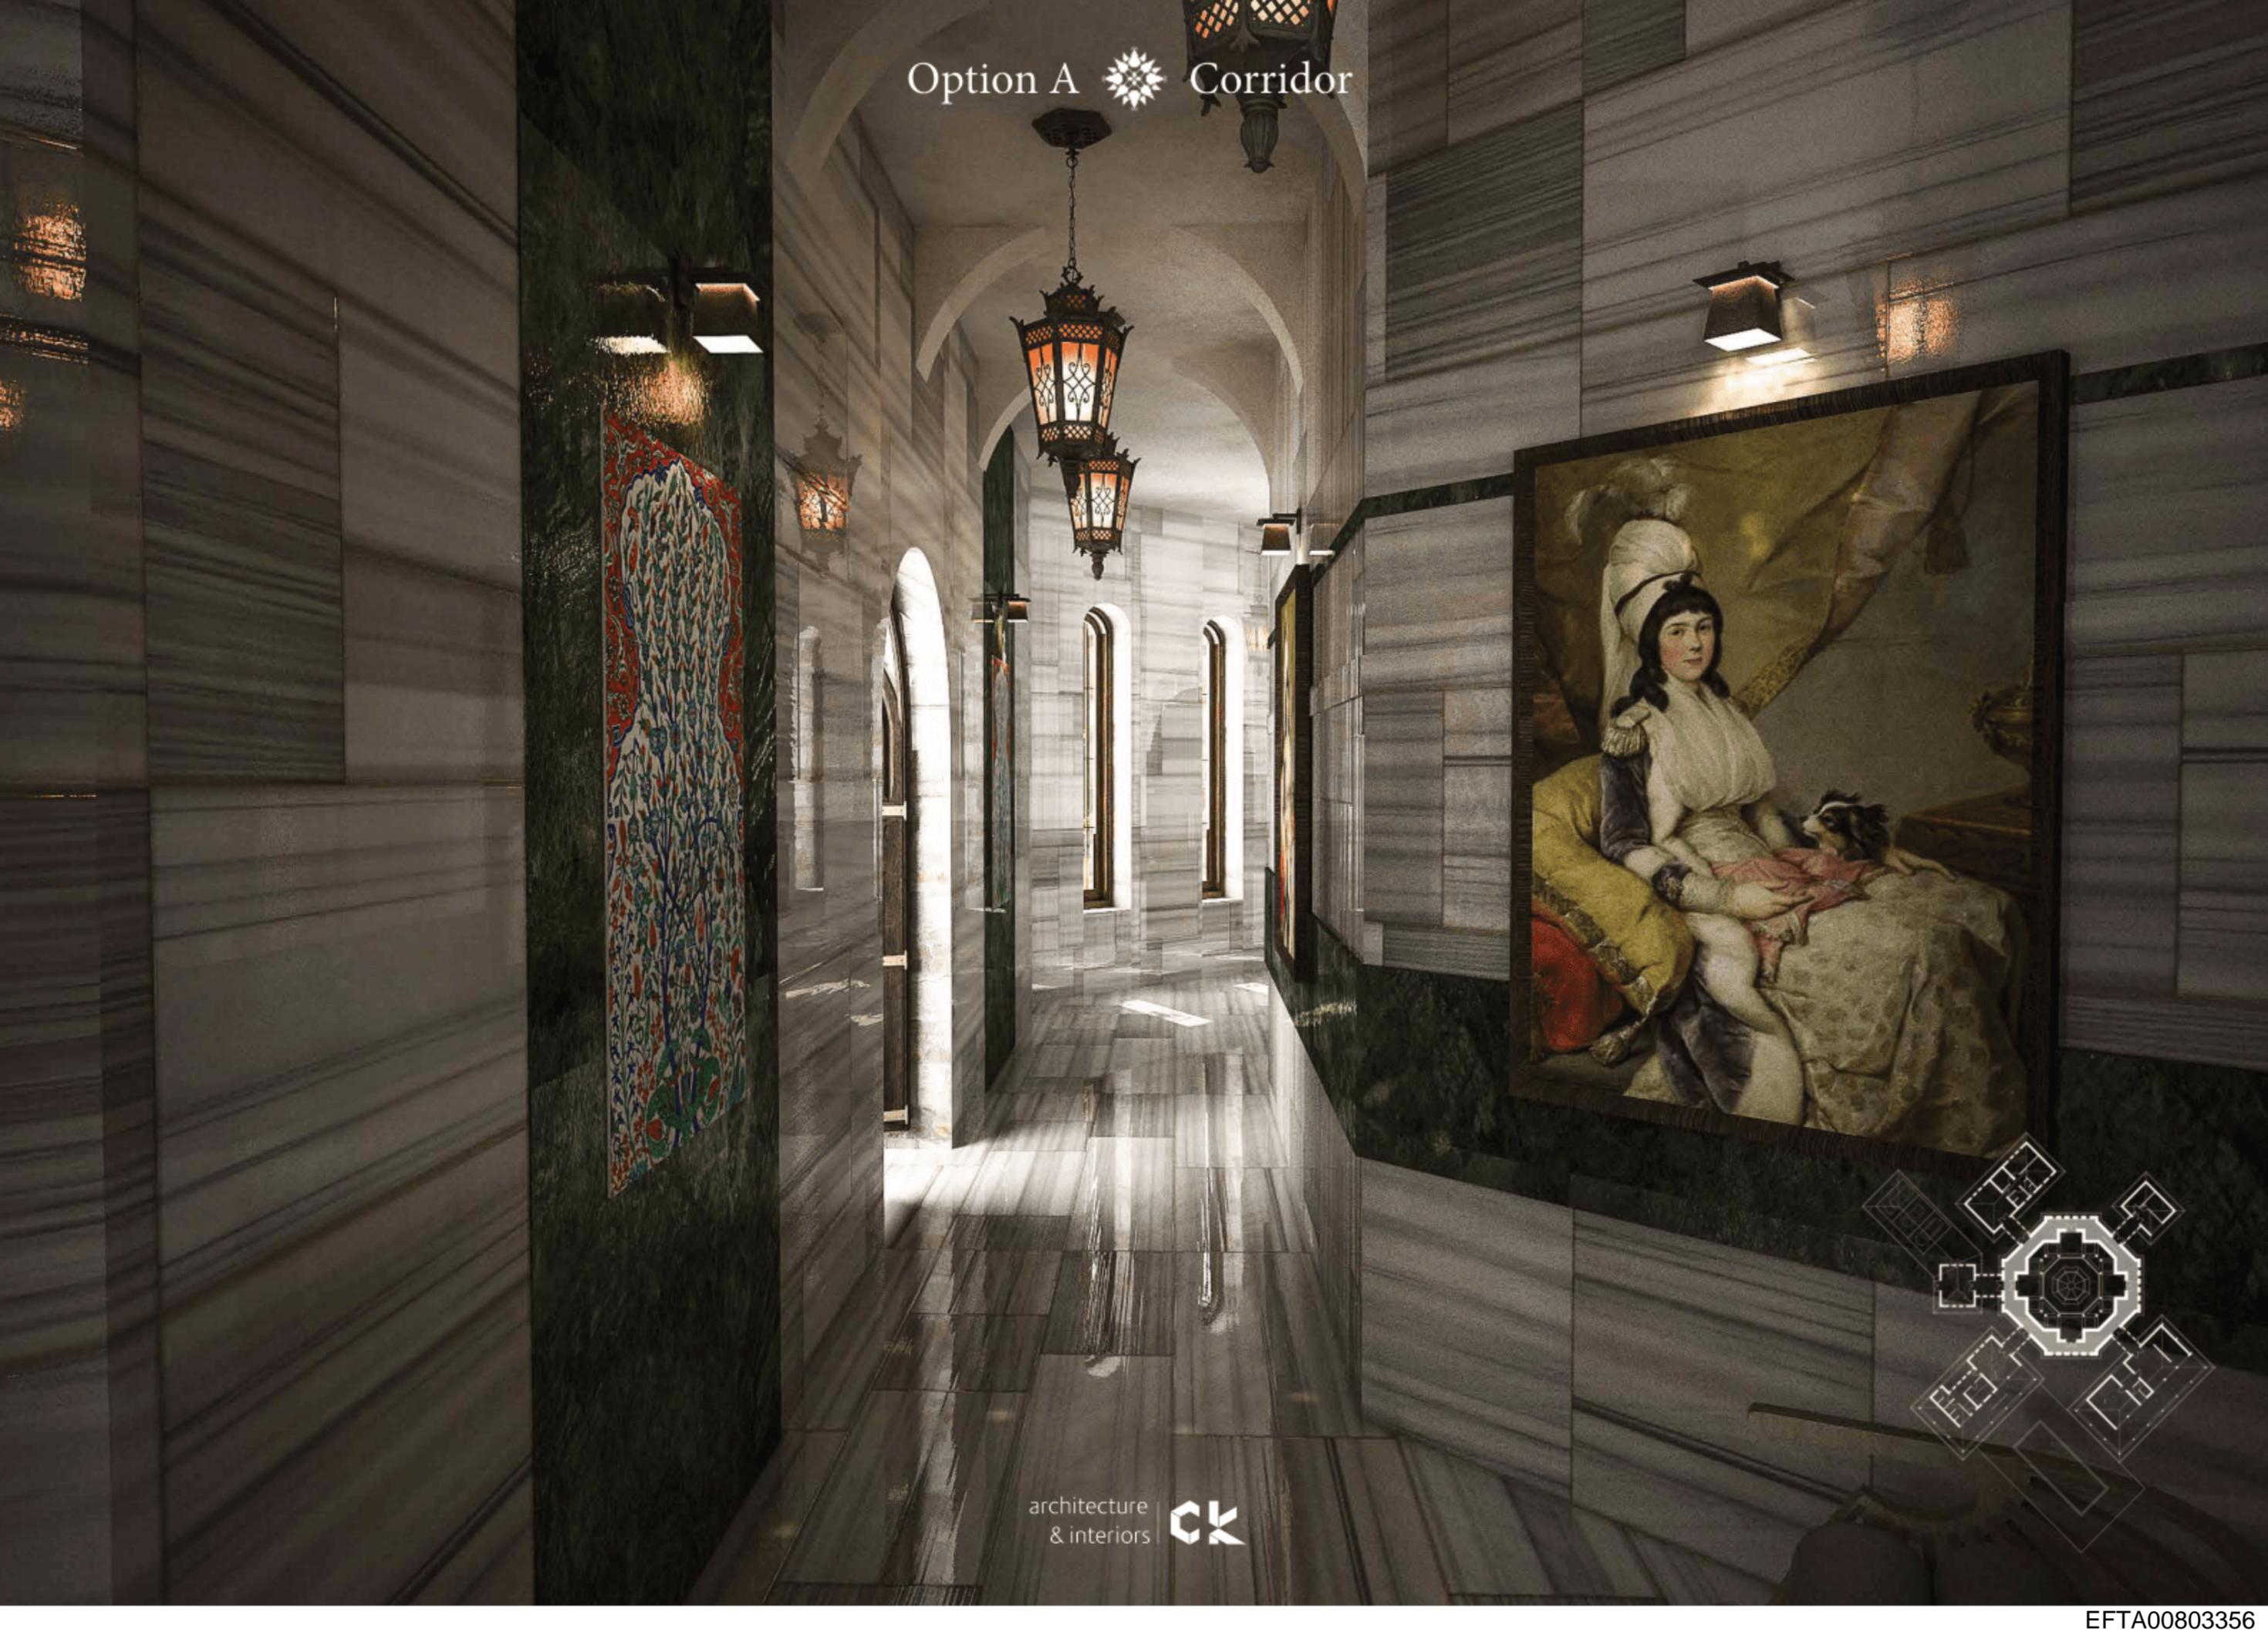

ROOMS AREA

Hammam	216.50 SQM
Relaxing area+terrace	149.30 SQM
Private part	177.90 SQM
Guest rooms	- SQM
Pool	322.00 SQM
Corridors	52.90 SQM
Staff+technical part	90.40 SQM
Steam room	36.90 SQM
Entrance	36.90 SQM
WC+showers	- SQM
Total floor area	677.00 SQM
Total construction area	1082.80 SQM
