Good Morning [Redacted]
Attached photo shows from bottom to top shower floor tile, shower wall tile, bathroom countertop material (your selection)
These samples are placed on Bathroom countertop material that was used at the STC office
Ken (granite installer) who just installed STC countertops has noted that the selected material is brittle and has a tendency to crack
Would you be Ok using the same material and color as STC?
There is very little difference between the 2
Please advise
Thank you
Warmest regards

Hi [Redacted]

Just to make sure I understand correctly, are you talking about the countertop material that we selected for the cabanas, the nice thick off white sample that Brice had, that we all liked, is brittle? and the one at STC is ok?

Evening [Redacted]

Yes - basing this on Ken the local granite contractor
Local word is we should go with what STC is using

Good evening [REDACTED]

I passed the message to Jeffrey, he still wants to proceed with the granite we chose initially please.

Thank you.

Good Morning [REDACTED]

Ok so the original choice

Thanks
