LETTER FROM THE GENERAL PARTNER

August 8, 2018

Dear Partners,

During the second quarter of 2018, Neoteny 3, LP (the “Fund”) made a couple of new investments and received sale proceeds from previously reported capital events. In addition, it continued to support its existing portfolio companies. The Fund invested an additional \$201K of capital during Q2 2018. On a cumulative basis, the Fund has invested \$8.48M of the original \$9M in partner commitments.

During the quarter ended June 30, 2018, the Fund made a \$50K initial investment in each of Luminopia, Inc. and Spatial Systems Inc. In addition, it made a \$50K follow-on investment in Sannpa Limited.

During the Seed-2 financing round for Klang Games GmbH (“Klang Games”), the Fund’s existing convertible note (in an original principal amount of \$250K) converted into 924 shares of Seed-2 stock. In addition, the Fund acquired an additional 94 shares of Seed-2 stock in Klang Games for \$50K.

The Fund’s SAFE in Shattersong Incorporated (“Shattersong”) converted into 24,254 shares of Series Seed 3 Preferred Stock during this past quarter. As part of this capital event, the Fund was issued 293,526 shares of Founders Preferred Stock in Certaintio Inc. (“Certaintio”). Certaintio is a company that grew out of Shattersong, and was supported by Shattersong for some time. As such, investors in Shattersong received a certain number of shares in Certaintio. Please refer to Appendix I for a description of Certaintio and the other portfolio companies.

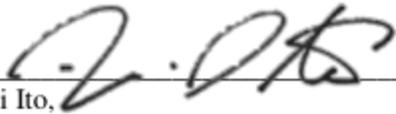

In April 2018, the Fund received initial proceeds of \$162,976 from an undisclosed sale of one of the portfolio companies. The Fund expects to receive an additional \$21,872 provided the holdback is released in full (for a total of \$184,848). This was a successful exit for the Fund, with a return on investment of about 1.85X.

The Fund also received \$14,274 in April 2018 as a result of Microsoft’s acquisition of Grasscrown, Inc. This amount is slightly less than 10% of the Fund’s investment in Grasscrown, Inc., and as such, was not a successful exit for the Fund.

Lastly, the Fund received confirmation from Wearality Corporation that it administratively dissolved on March 1, 2018 and wound up operations sometime prior to June 30, 2018. As such, the Fund wrote off this investment in Q2 2018. This resulted in a loss of \$129,038. The founder cited competition and a smaller than anticipated market for virtual reality as the main reasons for the company's end.

If you have any questions or comments, please feel free to contact the Fund. Thank you for your continued support.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Ito', written over a horizontal line.

Joichi Ito,
as manager of Neoteny 3 Management, LLC,
the General Partner of Neoteny 3, LP

NEOTENY 3, LP INVESTMENT PORTFOLIO

APPENDIX I - PORTFOLIO COMPANY DESCRIPTIONS

- **Affinity Hive, Inc.** is creating a way for groups of people with similar professional interests and goals to meet-up online and build professional relationships and conduct business. (<https://affinityhive.com>)
- **AOBiome LLC** is dedicated to advancing the science of Ammonia Oxidizing Bacteria (AOB) on human health. Topical applications of patented and stabilized AOB can restore the skin's microbiome and potentially impact a wide variety of human health conditions. (<http://www.aobiome.com/>)
- **ASAPP, Inc.** combines human and machine intelligence to transform communications. (<https://www.asapp.co/>)
- **Blackstorm Labs Inc. (f/k/a Game Closure, Inc.)** builds open source cutting edge gaming technology. It created DevKit, an open source tool for game developers to code faster and easier using HTML5 and JavaScript, and has now expanded to other gaming tools. (<http://blackstormlabs.com/> and <http://www.gameclosure.com/>)
- **Bonfire Studios, Inc.** is a video game studio located in Irvine, California. It is focused on making deeply engaging online multiplayer games for core gaming audiences. (<https://bonfirestudios.com>)
- **Caffeine Inc.** is a social broadcasting platform for gaming, entertainment, and the arts. (<https://www.caffeine.tv/>)
- **Certaintio Inc.** is company focused on identity protection / data security through blockchain technology. Certaintio distributes identity to the individual and away from the enterprise, creating unique sovereign and ultra-secure identities, and eliminating the single point of failure in traditional systems. Because identity data is secured on individual devices, it cannot be shared, hacked or used by people or services without permission – moreover, the private key never leaves the device. Certaintio uses a individual's device and anonymous records on the blockchain to prove who they are, and that they have the mandate claimed. (<http://www.certaintio.com>)
- **Crowd Supply, Inc.** is a crowd funding platform focused on new product development projects. The platform supports campaigns, pre-orders (once a campaign has been successfully funded) and e-commerce sales of completed, fully manufactured products. (<https://www.crowdsupply.com/>)
- **Dubset Media Holdings, Inc.** offers an innovative music marketplace for DJs, artists, labels, publishers, and distributors. Through cutting edge technology, rights management database, and easy to use dashboards, Dubset is creating new mix and remix distribution and monetization opportunities built on transparency, ownership, control, and simplicity. (<http://www.dubset.com/>)

- **Emerald Cloud Lab (f/k/a Emerald Therapeutics, Inc.)** comes from Emerald Therapeutics, a venture-backed biotechnology company based in San Francisco, California. It is a web-based life sciences lab, developed by scientists for scientists. Emerald Cloud Lab conducts lab experiments designed by customers, collects the data, and organizes it into a database that its customers can access remotely. (<http://emeraldcloudlab.com/>)
- **Figur8, Inc.** is a dynamic form tracking technology that measures 3D body shape and muscle symmetry. Our patent pending technology allows us to produce low-cost, wireless-enabled garments for a variety of applications including sizing measurements for e-commerce fashion retailers, and elastic adhesive tape for location-specific, on-body activity tracking in sports and fitness. (<http://www.figur8.me/>)
- **Formlabs Inc.** designs and manufactures 3D printing systems for engineers, designers, and artists. Its current products include the Form 1+ and Form 2 3D printers. (<http://formlabs.com/>)
- **HF DIY, PBC** makes fundamental investing fun and social through a gamified interactive platform where users can learn, test their skills, share content and invest. The company provides equity valuation tools and other analyses to help users develop their own investment view of any publicly traded stock. The company neither sells securities nor allows direct trading on its platform. Instead, it intends to partner with broker-dealers to facilitate these transactions. (<https://www.hfdiypbc.com/>)
- **IdeaFlow, Inc.** builds web-based software for teams to collaboratively create and analyze networks of information, supported by artificial intelligence that suggests additional relevant connections. It has commercialized a tool for financial services firms and hopes to broaden its scope by developing tools that unite personal information management, collaboration, and web search. (<https://ideafLOW.io/> or <https://ideapad.io/>)
- **InteraXon, Inc.** develops brain-sensing technologies, including Muse, the brain sensing headband. Muse is the first tool in the world that gives wearers accurate, real-time feedback on what is happening in their brains when meditating in order to improve their meditation practice. (<http://www.choosemuse.com/>)
- **Kemoko, Inc. (a/k/a Panoply)** is the company behind the mobile app Kokobot. Kokobot was designed to provide peer-to-peer mental health support through a social network that actually helps you feel better. (<http://itskoko.com/>)
- **Klang Games GmbH** is an independent game development studio based in Berlin, Germany. (<http://www.klang-games.com/>)
- **Knit Health, Inc.** is a design and technology company that is building a smart learning platform to help parents better understand and take action on their child's health and development. The company's initial focus is on sleep. (<http://www.knithealth.com/>)

- **Leade.rs, Inc.** works to find new leaders in a collaborative way and help them be more successful and have a greater impact on the world. The company has initially focused on giving new leaders a voice through various speaking opportunities. It also plans to help new leaders broaden their influence through the press, connecting them to investors, and anything that can help them succeed. (<http://leade.rs/>)
- **Lumii, Inc.** makes 3D images that jump off the screen - no special glasses required. Through research, the company has discovered how to create full-color, hologram-like prints (i.e. 3D images) using readily-available inkjet prints, media, and ink. Lumii is rolling out a design-focused, cost-effective service that incorporates the use of this 3D technology. (<http://www.lumiidisplay.com/>)
- **Luminopia, Inc.** is a virtual reality (VR) technology startup aimed at improving health. It is leveraging the latest in consumer VR technology to provide engaging, adaptive software that accommodates a variety of health conditions at various stages while providing a fun and desirable experience for the user that feels more like leisure than anything else. (<https://luminopia.com>)
- **Luminoso Technologies, Inc.** makes products that transform the way organizations interpret and act on large-scale customer, employee, and marketplace feedback. It analyzes data for a number of clients, including Intel, Sony, and NASA. (<http://www.luminoso.com>)
- **Move38, Inc.** is creating a new kind of tabletop game, with components that think for themselves, talk to each other, and come alive under your fingertips. The company wants to bring the best out of digital to hands-on, face-to-face experiences. (<https://move38.com/>)
- **Nuna Incorporated** is a health-technology startup headquartered in San Francisco, California. It partners with organizations to make a positive impact through data-driven healthcare projects. (<https://www.nuna.com/>)
- **OH2 Laboratories, LLC** is a synthetic materials lab. The company mainly focuses on developing variant water-soluble G-protein-coupled receptors (GPCRs) that maintain the functionality of the original. It also provides consulting services to pharma and other research entities. It continues to seek ways to monetize its technologies in drug and related arenas. (<http://www.oh2laboratories.com/>)
- **Optimus Ride Inc.** develops self-driving technologies to enable safe, sustainable, and equitable mobility solutions. (<http://www.optimusride.com/>)
- **Ori, Inc. (f/k/a Morphlab, Inc.)** enables effortless transformation of interior spaces. One of the ways it has done this is through the creation of the Ori System (an outgrowth of a project called CityHome). The Ori system is a multi-functional product that can be used as a bed, dining room table, kitchen surface and more, in order to maximize the efficiency of space in tiny apartments. (<http://www.orisystems.com/>)
- **Overture Life, Inc.** is a global start up with offices in the United States, United Kingdom and Spain. It is aiming to revolutionize embryology.

- **PCH International Holdings** is a custom design and manufacturing company that works with startups and Fortune 500 companies to take products from ideas through the various stages of product development. This includes the stages of design, manufacturing and packaging to distribution and retail. (<http://www.pchintl.com/>)
- **Pixel Labs, Inc.** runs Hoodline, a location-based content discovery platform, powered by local journalists and a community of contributors. It maps the world around you, to solve local news and information discovery globally, down to a 0.2 radius. The vision of Hoodline is to allow locals to discover the pulse of their city, and for travelers to experience a city like locals do. (<http://www.pixellabs.io/> and (<https://www.hoodline.com/>)
- **Sannpa, Ltd.** is the holding company for Fnatic. Fnatic is the world's number one electronic sports brand. Started 10 years ago in the nascent competitive video gaming market, Fnatic has grown to be a powerhouse. Having won thousands of tournaments, over 10m USD in prizes across more than 20 games, the most out of any e-sports brand. This has led to over 8m followers across social media, with tens of millions more viewing the company's professional players each month. As brand, they are driven to lead the New World Sport into every household, through content, products and experiences. (<http://www.fnatic.com>)
- **Shuttersong Incorporated** created the Shuttersong App that lets users combine digital images with sound and share the resulting Shuttersong with family, friends, and colleagues through social networks, e-mail, or text. (<http://www.shuttersong.com/>)
