

## **Why do I want to work for Jeffrey?**

The future as a building. It consists of different bricks. To build it you need to put a lot of effort, attention and diligence. Role of the foundation performs contact with the right people. So, why do I want to work for Jeffrey?

I was pondering about this question because I will never have a chance to start again. This is like the beginning of the way, taking care in continue to rely on an excellent future. At our first meeting or rather at the first conversation, you gave me a red clock and said "fix it," I decided that it was something like a test to check how smart I am and was very worried at that moment. Worried not from ignorance how to fix the clock but from the fact that I can lose such, albeit small, but a chance to prove myself. One of the reasons why I want to work with you is training and developing myself from all sides on real experience and your incredibly necessary advices. I usually listen advices but do not always perceive it. But what about yours its totally different thing. I take it properly in the understanding that "you must do this [REDACTED]" because it is very important to be directed to the right path by such an experienced intelligent and successful person. I want to be able to do anything, I want to learn new things every day, I want to see the world, people, their lifes, I want to discover new skills and share them with you. When I saw your team (another reason for my desire to work with you), I was just amazed and at the time of departure, I was very motivated. [REDACTED] showed me how important it is to be smart and to understand many things, [REDACTED] showed how much a woman can be a woman, her energy and strength. I want to learn all of this and even more.

I understand that a single desire to achieve this goal is not enough. I need certain actions and the return to which I am 100% ready!
