Hi Boris:

Sorry for the delay in contacting you, I wanted to get some more specifics in regards to my

diagnosis. My vision has been a topic of great discussion among my medical team, and the current belief is that I have CVI. I've had multiple eye surgeries to correct

for strabismus
through St. Louis
Children's Hospital,
and have been seen
by that team for
years.

I currently complete
all my work at a 48

pt font, and have
great difficulty
reading anything
below that as well as
plotting/reading
graphs.

Please let me know
if there are any

other questions that
I can answer. I
appreciate all of
your help.

Thanks
Michael
