Would you please find herewith 3 different propositions:

On the 3rd one, I did it as it is the same as in Paris, but the room is too long

On the 2nd one, the one I prefer with a central seat, see the photo, which can be more modern but it shows the idea

On the 1st one, the interesting thing would be to have a huge square table with a collection of objects and some stools all around, but with only one sofa

Thanks for your answers
