---

Boscoe said the Cylinder lining in the Engine is not working and he can not run the barge until it's fixed. He said Mr. Lee Thompson is the only person that he knows that can fix that problem. I asked him to have him come out asap

Text messages from Boscoe & Anna:

Boscoe: Something bad just happened to the port motor on the barge. It either lost an injector or swallowed a valve. Not good

Anna: 😱 OMG! Are you ok

Anna: Would you be able to check it out tomorrow if possible?

Anna: Thought it was a fire but it's a big fault in the port engine. It's gotta be cleaned and evaluated then disassembled to examine the fault.

Boscoe: I spoke to a specialist. He is gonna look at it with me tomorrow. But I need a cleanup crew...

Anna: ok, I'll call some of the guys right now

Boscoe: Looks like we plan it in the morning. We are gonna need a pressure washer.....

Boscoe: Big problem #2 cylinder liner is toast...

Anna: The barge is broken down 😞 meaning no runs until it's fixed?

Boscoe: Correct

Ann R.
