Rich

Attached are proposals from both TSG and GWS (Gemini Water Services) for the refurbishment of the SW RO on LSJ

As shown there are **Immediate Repairs** required  
Replacement of Control Panels, 75 hp Motor, Pump and Media filter service.  
This is outside of any work TSG have already been approved for.

At this time the RO is operational, but failure of any of the above items would cause the plant to shutdown and the Repair Time would be **Lengthy and could lead to water restrictions and or the need to purchase water.**

The option to Expand the Plant could be done at the same time.

My recommendation is to proceed with Gemini Water Services.

Can we proceed with finalizing contracts with GWS?

regards
