---

our physical sense organs eyes , ears touch smell taste. .and maybe a location sense ( my view ) all operate in a very narrow band , we can only hear 20 - 20z hertz , see only a very narrow band across the electromagnetic spectrum feel touch from mil ounces to a few pounds. smell only a few smells ( dog better )

. these inputs along with , emotions , reflex, , all form a multidimensional shape . a mobject. ( ie a mental object ). language is an attempt to be able to transmit my mobject to another brain. . i use words gestures music, sounds. touch to transmit my mobject. it is necessary for animals that form a group. cells that form organs need to communicate with each other , and the whole entity , and the whole entity or group communicates with the individuals. . mobjects are somewhat like what Wittgenstein called a mental picture, but picture is the wrong translation. they have more dimensions than pictures.

the next subject is probability, it is important for you to grasp. If i tell you that 5 percent of all indian men will die at age 62, and ask , you what does that mean about your chances to die when you are 62. most people say 5 percent. THAT is not true , NOT true at all , the statement says that if I have a group of 1000 men , 50 are likely to die. that is it, it says absolutley nothing about any single individual. . nothing at all. unless the probability is zero or 100 percent. very odd. .
