Subject: FW: Synthetic Vision System Now Certified on the Gulfstream IV and Gulfstream V

Larry – again, good talking with you earlier. Just some additional info on SVS for your G-IV... The straight G-IV (non-SP) should have its cert for SVS in August this year.

Best regards,
Ed

The Honeywell Synthetic Vision System (SVS) is now certified and available as **PlaneDeck SV** for your **Gulfstream IVSP and Gulfstream V** aircraft bringing features only found previously in the more advanced G-450 and G-550 cockpits. For operators that are considering upgrading their displays to the new LCD DU-885s **OR** have already upgraded to DU-885, this terrain-based data driven synthetic vision system can be added today.

Attached is the Honeywell brochure describing this significant upgrade to the cockpit which brings:

- Highly enhanced situational awareness in all flight regimes (climb, take-off and ILS approach examples shown above)
- TCAS symbology to moving map as additional overlay

- METARS and Terminal Area Forecasts (TAF) to the available XM Weather display selections

Please feel free to contact me (see below) for more information or your Gulfstream sales representative for a quote and lead-time. Start planning today!

Best regards,

Ed Borger
