Good day Boss

I continued to investigate STC's slow bandwidth yesterday and this morning and found our AI server (for Mr. Gortzell and Amen) was using 2.3 MB last night and early this morning. I suspect that this was the cause of STC's slow internet access. I have emailed Amen to verify my findings. In addition, I will inquire if STC's 10MB service needs to increase to support their connection without interfering with STC's day to day internet operations.

I reviewed the existing Sony Equipment. It is a surround sound receiver / dvd player all-in-one device. I believe this was either in the kitchen or chillax room before the renovations and the new TVs were installed.

Do you wish me to setup tomorrow in the kitchen or chillax for you to hear it, or just remove it?

Regards

Jruan
