You left me unspeakable and highly emotional when you expressed your plan for the Marrakech property. After you left, I was all the time wondering what will I say or write to you. I have always considered you dear to my heart and as a brother. In spite of our special relationship, I never thought you have such high feelings and concerns towards me as shown towards a real brother. Your considering me as family as much as to leave an inheritance for me, means a lot which I will not be able to express in words. I have been blessed with all the comforts and good things in life and with God's grace have all that I need. Hence, for me it is not a matter of wealth or inheritance, but the trust and place you have given me in your heart, which one could usually give only to ones own blood. I will never be able to express how I really feel about this act of yours. But let me say that in spite of anything, we will remain brothers and close to each other and let life be so long for both of us that we do not have to miss our relationship.

My grandfather, used to say that if you are a really lucky person, you can count your true friends in the fingers of one hand, in your entire life, who will be true friends you can always rely and cherish upon! You are indeed one of them
