I connected yesterday with Marmon. Based on facts presented below I was told verbally that rough approximate cost was \$50 per foot. In order to formalize quote they need more info such as amps voltage and some additional info from wapa. Not sure if you want to move along further at this point or wait. In addition they are asking for name of island and timing. Please advise if ok to provide info. Thank you.

Rich-Can you give me the name of the island that the cable will feed so we can estimate the route? Also what is the timing of this project. That is important when estimating.

Ed

It was nice talking with you earlier. Facts are as follows:

- 1) 9000 feet of 15kv 3 phase underwater cable needed
- 2) transformer will be approximately 300 kW

Please advise what other info you need to provide material pricing in addition to install costs.

Thank you

Rich
