Here is the term sheet and a preliminary cap table.

The cap table will change depending on whether Max Giant (Kwok) comes in or not. Part of me prefers they do not, even though they are coming in at \$2.00/share.

I am taking some of my common stock (ST 1100) and moving it to ST 1100 Preferred to bring your share price down to \$1.10.

Hi all,

I thought I would share some more data on Tarana technology. The Exec Summary and

The Example Tests are what I actually did with the units in the field. I tested a bunch of different non-line of site shots and was incredibly impressed.

An update on the closing – it is still on track for end of this month, maybe another 14 days. We completed a very detailed binding term sheet so the definitive documents, so far, have been pretty straight forward.

Have a great weekend,  
Greg
