Subject: AlureVe Busienss Opportunity

Hi [REDACTED],

It was good to chat briefly to you this morning about LunchBOX and my new business, AlureVe. I an excited to share this with you. As mentioned I have become a part of a new, ground floor opportunity and have already seen a growth in my business. I have started a team in UT, AZ, ID, CA and want to build a team in NY and CT. I would like to invite you to be a part of this.

Despite being busy and committed to the kids and my Paint Mixer business and LuncBOX CA, I have recently launched a new business and I'm as excited about this as anything I've ever done and that's saying something! Basically I got very fortunate to be introduced at the ground floor of the expansion of a multi-million dollar company. They were looking for some key people, and I was in the right place at the right time. The official product launch just happened in September of last year and what I got really excited about was that there are very few involved on the East Coast. The company has asked me to help them identify some potential key business partners in Connecticut/New York to help them open the market.

AlureVe, an international multi-million dollar company, is building a team of Business Partners to be a part of the global anti-aging and skin care industry. AlureVe launched a ground-breaking revolutionary proven and heavily patented skin care science in September 2015. This opportunity involves a revolutionary patented skin care line, which has just launched in the US. Dr. Danyi Quan, a world-renowned pharmaceutical scientist who developed the patch, has integrated the transdermal patch technology into skin care products. There is nothing like it out there making it incredibly unique, and nobody can copy it because it's protected by 27 different patents.

I would love to determine if you and others you are the right fit with the right qualifications, and connections to make this happen for you! I look forward to our call tomorrow with Raquel Horton, one of my partners, tomorrow at 11am EST.

Love [REDACTED]
