its simple, leon should have a chart that has on one axis number of hours flown the other axis percentage of biz flights. each cell contains total pre tax and one chart after tax, so he sees the crossover. there is no asset increase to be 135, . most private owners dont want it .. . corps do. . . variable cost , is added to fixed cost and a total cost per hour is easy. . someone needs to check with jet to see if maintenance , upgrades to avionics etc is due this year or next. . I was surprised that after all the consultants there was still not a prospective budget? . , 1 get rid of entities , form a new llc. leon should own it all . not debra . . should take less than a week, . leon might want to ask re keeping the loan on at same value? , .
