im glad. can we consider mobjects. ie mental objects. they should be a multivariaible string. each variable a different sense. emotion and place marker ie mental girl. . smell , s1 visual v1 , touch (haptic) h1, sound a1. place (school) p1 , emotion. e1 excitement. next girl is similar .? similar excitement? (distance function on our s2v2h2a2p2e2 string . if visual is missing , is the amplitude of the other variables enhanced?
