i see mappings of the external signals into MOBJECTS< . mental objects. the objects are multidimensional. a mobject could consist of a sound patttern visual pattern smell ... location. and emotional variable.). mobjects consist of cohenrent maps . (a sense maker shape). images for example are compared to our landscape and if they fall within some sort of distance , they are considered part of the " reality set ". people who have extraordinary ability can map mobjects onto real world are called artists. some map the mobject to images some to sounds.
