Subject: To John Fitzgerald Re: Institute for Music & Brain Science/UC Multi-Campus Symposium

Date: Wed, 30 Sep 2015 22:18:39 +0000

Attachments: UCPresidentsSymposium.pdf

Dear John,

Just off the phone with Remo - thank you for joining us in his stead amidst his urgent commitment -

Please find attached an updated schedule of the inaugural UC Multi-Campus Symposium on Music Research - I invited Remo and Ami to attend the Friday "bullet talks" for UC faculty and students, which should include an interesting sample of faculty, students, and research projects relevant to our non-profits' mutual interest in music, health and medicine.

The Thurs night event is an open public event - please extend our invitation to those lectures and performance to your family, friends, and your colleague at Remo Health Rhythms.

Thurs at 1:30-3:30p, The Institute for Music & Brain Science Board is meeting at the Redwood Room in the UCLA Faculty Center for lunch and a meeting. We were planning to present an overview of the proposal I have been discussing with Remo re: a prospective randomized-controlled trial examining the potential benefits of group drumming on gait, balance, and fall prevention in Parkinson Disease, Alzheimer Disease, and normal aging. Falling has reached epidemic proportions in the elderly and carries with it a high incidence of mortality at 1 year. Remo assured me you were even more knowledgeable than he about how to design the study and wanted to be sure I extended the invitation to the Board meeting. Please visit us at [REDACTED] - Board Chair Dr Robert Freeman, who is delivering the Keynote at the Symposium Thurs night, will be there along with several other Board members.

I look forward to meeting you Thurs at 1:30p! Please don't hesitate to text or call my cell for any reason - [REDACTED].

Yours,
Mark

Mark Tramo MD PhD
UCLA Depts of Neurology & Ethnomusicology
Director, The Institute for Music & Brain Science
